DARING COLOURS.
UNFORGETTABLE SPACES.

BOLD DESIGNS

Enhance creativity and collaboration, and boost morale with the &-collection. & reflects the diverse, dynamic spirit of modern environments. This bold carpet tile collection – Cambridge&, Perpetual&, Fluid&, Fashion& and Velvet& - transforms your business into an unforgettable space that inspires creativity.

Each design in the “&” collection brings a unique sense of boldness or sophistication to your space. Combining the different designs creates your own distinct identity and evokes creativity.

INSPIRING
CREATIVITY

The “&” collection is an invitation to express your business’s unique personality through vibrant, unforgettable spaces.

The collection transcends the boundaries of functionality and aesthetics. It encapsulates the essence of making a profound statement through your design choices.

Each design within this collection is a testament to your unique style, your willingness to challenge the norm, and your desire to create an environment that echoes with your boldness.

Step into a world where design is a dialogue, where the ordinary is transformed into the extraordinary, and where your space is a reflection of your audacity. Your surroundings are no longer confined to the conventional; instead, they become a canvas on which your audacious spirit is vividly displayed.

WHERE AUDACITY MEETS DESIGN

A SPLASH OF COLOUR

A space where a monochrome design dominates emanates a sense of gravitas. But it can also stifle creativity and quash enthusiasm. This is precisely where the strategic inclusion of bold-coloured carpet tiles takes centre stage. These tiles transcend their functional essence - they are dynamic design instruments, wielding the power to redefine an entire spatial narrative.

"&" reflects the diverse, dynamic spirit of modern environments. It embraces the idea that spaces can be transformed into vivid canvasses of colour, inspiring creativity, fostering collaboration, and enhancing mood.

Bold and vibrant, sophisticated and luxurious - the "&" collection paints with a broad palette of bright colours that add a splash of "oomph" to any room.

In a world often confined to monochromatic simplicity, the "&" collection is a symphony of hues that sings the praises of differentiation. It's a tribute to those who aren't afraid to stand out, to those who value the dynamism and energy of vibrant colours. Let your space tell your story, and let it be bold, with the "&" collection.

TEXTURES

Add personality to your space with Fashion&. This collection, with its broad selection of colours, has a linear loop pile texture with a subtle shine. Fashion& is a timeless yet fun collection that exudes personality and uniqueness. Combine different colours of this collection to create a fun and colourful space or use a specific colour to create zones in your space.

Perpetual& adds timelessness to the “&” collection. Its appeal lies in its delicate loop pile texture, that brings your interior to another level.

Unleash your creativity with the “&” collection by mixing and matching different textures and designs within a single space. Where the sophistication of cut pile coexists harmoniously with the resilience of loop pile, forming a visual symphony that’s as practical as it is aesthetically pleasing. Or where tip-sheared tiles provide a subtle yet impactful backdrop to a vibrant seating arrangement. The possibilities are endless with “&”.

The collection comprises three distinct textures: cut pile, loop pile, and tip-sheared. Each texture has its own unique characteristics, catering to different aesthetics and functional needs.

Cambridge&, a cut pile carpet tile design, offers an elegant and opulent texture which looks inviting and is soft to the touch. Mix it with tip-sheared carpet tiles such as the luxurious Velvet& or the bold-patterned Fluid& in the same colour hues to create an eye-catching monochromatic interior.

Discover the technical details and sustainability credentials of the & collection group, showcasing our commitment to quality and responsible manufacturing.
